

CISCO-0650

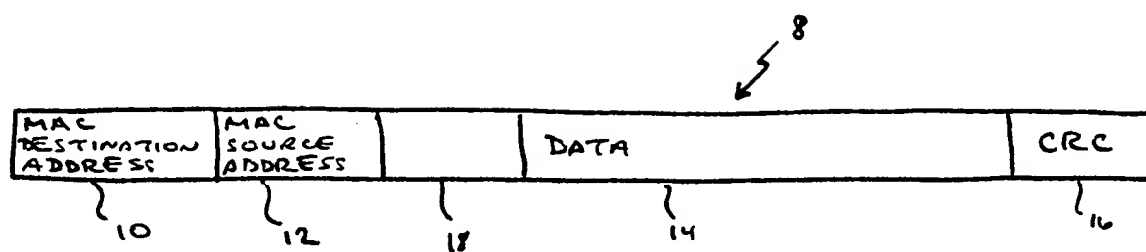

FIG. 1A

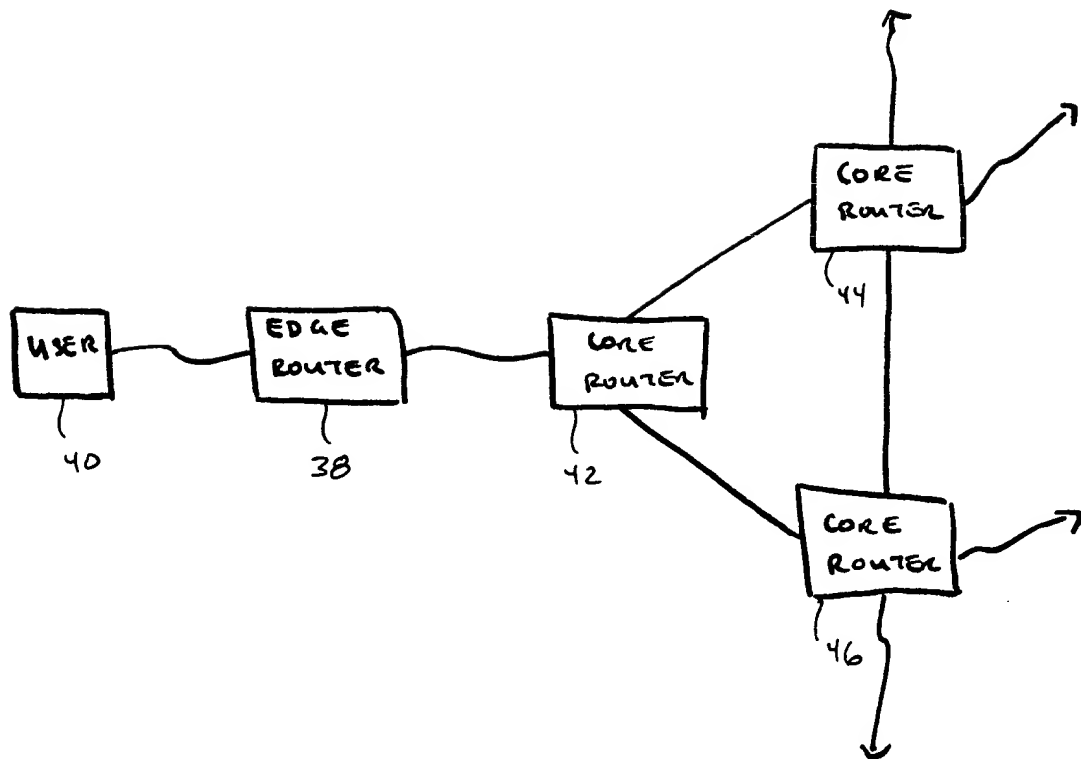

CISCO-0650

Byte 0		Byte 1		Byte 2		Byte 3		
4-bit version	4-bit hd len	TOS value <u>26</u>		13_ len (in bytes)				
16-bit identification				3-bit flags	13-bit fragment offset			
<u>TTL</u>		prot_type <u>28</u>		csum				
Source IP address						<u>30</u>		
Dest IP address						<u>32</u>		
Options (if any)								
Source port number <u>34</u>				Dest port number <u>36</u>				TCP/UDP only
32 bit sequence number								
32 bit acknowledge number								
4-bit hll	Reserved (6 bits)		u a p r s f r c k s y n h		16 bit window size			TCP only
16 bit TCP checksum				16 bit urgent pointer				

TCP/UDP only

TCP only
